for the
Commercial
Market

Spire Solar Systems

Solar Systems Integration and Service Provider

Spire Solar Systems is a full-service solar firm specializing in systems for commercial, municipal, and utility applications. We offer an extensive range of PV technologies and capabilities that can be tailored to your unique requirements. With Spire Solar Systems, you can:

- Reduce your current and future electricity costs through natural, renewable energy
- Implement a turnkey solution that encompasses everything from design and installation to interconnection, monitoring, and maintenance
- Choose from the industry's broadest range of PV products, backed by leading warranties
- Capitalize on far-reaching expertise that includes our assistance with financing, state and federal incentives, and community outreach

An Innovative PV Leader with Comprehensive Experience

Spire solutions are built on a foundation that includes of 30 years of PV industry experience. Our insight and expertise have been applied to many innovative projects over recent years, including nearly all commercial PV systems in Chicago and the largest PV installation in Boston. Spire is a leader in BIPV advancements, such as the industry's first commercial application of clear back-sheet PV modules and window awnings that provide shade and solar power. Our experience and innovation guarantees you a well designed solution that performs as promised.

Spire Solar Systems provided PV for all Chicago Solar Partnership systems
